Summary

I am a results-driven Python Django Developer with over 4.11 years of experience building and managing web applications within enterprise environments. I specialize in full-stack development and am proficient in Python, Django, flask and related technologies. I have strong expertise in architecting high-performance applications, troubleshooting complex APIs, and mentoring junior developers. I actively contribute to innovative initiatives and am committed to delivering impactful results through collaborative problem-solving.

Experience

OC Specialities Pvt. Ltd

Vile Parle, Mumbai

Python Developer

01/2025-present

Chemical Manufacturing Company specializing in specialty chemicals and process-based production operations.

- Designed and developed scalable web application using Python, Django, Flask and Rest Api ensuring high performance reliability across all modules. Built role-based access control systems for department-level data security.
- Deploy web application using Gunicorn, Nginx on Linux server
- Developed automated workflows for data processing, reporting and scheduled jobs
- Built responsive and user friendly UI components using Tailwind/Bootstrap, JavaScript ensuring seamless user experience across devices
- Managed the full development lifecycle including requirements analysis, architecture design, coding testing, Version Control (Git) and deployment

DCB Bank

Lower Parel, Mumbai

Application Developer/ Support Engineer

04/2022 - 12/2024

A leading private sector bank providing a range of banking services

- Developed and enhanced modules for the Mutual Fund Operations Portal based on business requirements from multiple internal teams using Python(Backend) and React (frontend), To automate business workflows using celery, celerybeat and reduce manual processing.
- Troubleshoot production issues, performed log analysis, and delivered fixes improving system stability and uptime.
- Developed a high-performance file-processing system allowing users to upload 1GB+ CSV files asynchronously using python, Celery, Redis, and a responsive Bootstrap-based frontend

Maxgen Technology Pvt. Ltd

Vashi, Navi Mumbai

Jr. Python Django Developer

04/2021 - 04/2022

A technology startup company focused on delivering IT services and solutions.

- Developed full-stack web applications using Django, ensuring clean architecture and scalable backend functionality
- Provided technical guidance and training to junior developers and interns, supporting their learning and project execution
- Collaborated with internal teams to gather requirements, analyze business needs and deliver technical solutions

Skills

Python, Django, Flask, FastAPI, Django REST Framework (DRF), Celery, Celery Beat, Redis, HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, Git/GitHub, Linux (Redhat, Ubuntu), API Development, Debugging & Troubleshooting, MS-SQL, Postgre-SQL, ORM Modeling, Asynchronous Task Processing, Deployment (Gunicorn, Nginx), AWS Deployment, REST API Integration, Authentication & Authorization (Django AllAuth)

Projects

OneSource - Full-Stack ERP System

Full-Stack ERP System designed for comprehensive business operation management

- Project covering end-to-end business operations across all departments (QC, EHS, Production, R&D, HR, Store, Effluent Tracking, Personal Care, Import & Export, Department Budget).
- Designed and developed from scratch, ensuring smooth workflow automation, centralized data storage, and accurate reporting with auto email notification.
- Built multi-module architecture to manage end-to-end processes
- Developed dashboards, workflows, role-based access, and MIS reports
- Collaborated with teams to gather requirements and map processes effectively

HR & IT Employee Onboarding & Access Approval Automation

Improved HR and IT collaboration through an automated onboarding process

- Automated new employee onboarding system to capture HR requirements and manage IT credentials, access, and asset approvals
- Implemented multi-level approval flow involving HR, IT Infra Team, and IT Head
- Automated email notifications and approval updates between HR and IT teams
- Centralized employee joining details, credentials, system access, and asset allocation
- Eliminated manual follow-ups and reduced onboarding coordination effort

Canteen Attendance & Billing Automation

System to streamline canteen attendance and billing reporting

- Automated canteen attendance and billing system integrated with biometric punch machines
- Implemented backend logic to calculate daily/monthly consumption
- Automated report building to eliminate manual HR effort

Visitor Management System

System to manage visitor entries and approvals efficiently

- Developed a visitor entry management solution enabling users to generate digital gate passes
- Automated visitor approval workflow with email notifications
- Maintained visitor logs, entry records, and real-time status tracking

Mutual Fund Operations Portal

Improvements to the existing Mutual Fund Operations Portal

- Enhanced multiple modules in the Mutual Fund Operations Portal based on business requirements
- Developed a high-performance file-processing feature for large file uploads
- Improved data processing speed and optimized backend workflows
